

ALEX EXAMPLE

Embedded Systems Engineer

+1 202-555-0147 ♦ Example City ♦ alex@example.com ♦ LinkedIn ♦ GitHub

PROFILE

Embedded systems engineer with experience developing reliable hardware and software prototypes. Interested in digital design, signal processing, and resource-efficient systems.

HARD SKILLS & TOOLS

- Embedded C
- C++
- Python
- VHDL
- FPGA
- Linux
- Git
- Digital Signal Processing
- Test Automation
- Technical Documentation

EDUCATION

B.Eng. Electrical & Computer Engineering

Northstar Institute of Technology

2020 – 2024

Grade: Distinction

Studied embedded computing, digital electronics, and signal processing through laboratory work and team projects.

- **Digital Systems:** Designed and verified synchronous logic.
- **Real-Time Systems:** Developed software for constrained devices.
 - **Engineering analysis:** Modelled and evaluated system behaviour.
 - **Technical reporting:** Documented designs and experimental results.

WORK EXPERIENCE

Embedded Software Engineer — Prototype Development Team

July 2024 – Present

Aurora Systems Ltd.

Develops embedded prototypes for sensing and control applications.

- **Firmware development:** Implemented and tested device drivers.
- **System integration:** Integrated firmware with custom hardware.
- **Collaboration:** Worked with hardware and test engineers.

PROJECTS

Low-Power Environmental Sensor

January 2024 – May 2024

Open Hardware Guild

Team project creating a battery-powered sensing and telemetry prototype.

- **Sampling interval:** 1 s — Configurable from the device interface.
- **Average power:** 120 mW
 - Implemented sensor acquisition and packet encoding.
 - Published fictional [project documentation](#).

ADDITIONAL INFORMATION

Languages:

English

 Native;

Spanish

 Professional working proficiency

Career interests: Embedded systems, digital design, and dependable engineering tools.

Personal qualities: Methodical problem-solver; Clear communicator

Interests: Cycling, Open-source hardware

OTHER ACHIEVEMENTS

Student Design Award

2024

Example Engineering Foundation

Recognised for the environmental-sensor project.

- Selected from 40 project teams.
- Presented the design at the annual showcase.

May 2024
